

Cropland. Tolerance Revocation of 'Maneb' (Thursday 5/27/2010 9:32 AM).

*By Cecil Tharp, Pesticide Education Specialist*

Growers using up existing stocks of 'maneb' should be aware of EPA's planned 'tolerance revocation' of maneb. A tolerance revocation would mean that even 'existing' stocks of maneb could not be used after July 26th, 2010. More details of this tolerance revocation can be viewed at

<http://www.pesticides.montana.edu/News/Miscellaneous/maneb%20proposed%20tolerance%20revocation.pdf>.

See more details of an earlier MSU news alert regarding cancelation of maneb registrations at

<http://www.pesticides.montana.edu/News/Miscellaneous/manebalert.pdf>.

Open comment period until July 26th, 2010. Comments should be made to docket #EPA-HQ-OPP-2010-0327.

Ag leaders are urged to forward this information to any growers who are using existing stocks of 'maneb' and may need the tolerance to remain in place for a longer period of time.

**FOR FURTHER INFORMATION:** Contact the MSU Pesticide Education Program (Cecil Tharp, [ctharp@montana.edu](mailto:ctharp@montana.edu), (406)994-5067 or see the complete tolerance revocation document online at [maneb tolerance revocation](#).
